Be the fastest to identify the shapes and score the most points!

Instructions:

- First, choose one player to act as the programmer. This player will need to know and use OzoBlockly. (OzoBlockly.com)
- Everyone else chooses a player number.
- The programmer chooses a random Shape Tracer card without showing the group. They then recreate that shape using OzoBlockly, and load to Ozobot.
- Players gather around the Game Mat with their player number cards ready. When the programmer runs Ozobot, players will have to guess what shape Ozobot is creating by putting their player card on the correct shape.
- Watch Out! Once your card is placed, you can not change your answer!

Scoring:

- The first person to place their card on the correct answer wins 2 points, all other correct answers win 1 point.
- If no players get the correct answer, no points are given.
- The first player to reach 7 points, wins!

Optional Gameplay:

- Each player card has 2 colors on it. If the first color Ozobot uses for each shape matches a color on your player card, you get a point!

Combine Shape Tracer 1 and Shape Tracer 2 games for a MEGA Shape Tracer Game!
